

What are NetSpots?

Netspots: The ultimate interactive e-Marketing experience.

e-Marketing is highly targeted, personal, interactive, and best of all, it won't break the bank and effectively reaches consumers, reinforcing your brand and driving sales. Research shows that consumers like to see a media rich message that downloads immediately, contains animation and sound and doesn't require special software or crash the computer. Basically, we invented the NetSpot® to be your mini web commercial.

Why not use your latest brochure elements or even your TV commercial as a NetSpot, and send it directly to a target audience of 1 or 1 million or more?

Entertainment

Celine Dion

UPN 45 Phoenix promo

Fox 10 Phoenix promo

Britney Spears/On Air

Business

Holiday 2005

The Jensen Estate

Brand Sense Symposium

Dennis Kucinich
